

# FULL SIZE RIGID PANEL INFORMATION

## NEW 8' X 4' FULL SIZE RIGID PANELS

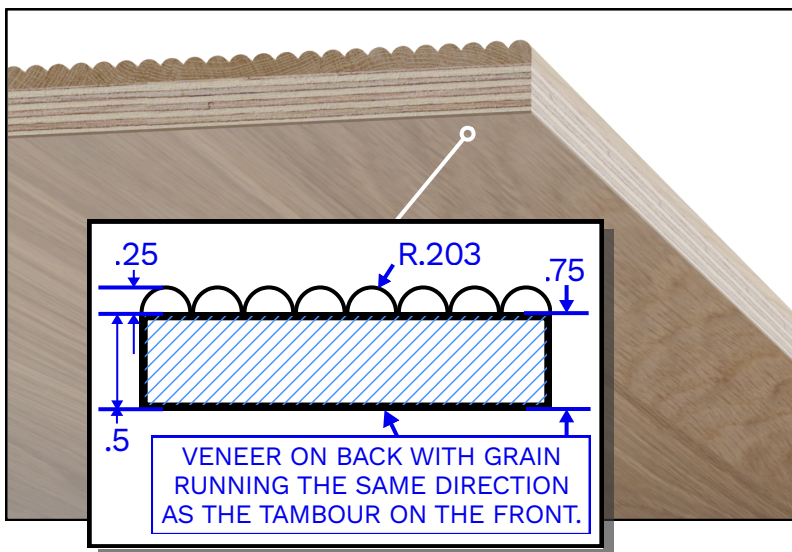

Designs of Distinction® has introduced its new **Full Size Rigid Panels**, engineered to combine the beauty of wood tambour with the strength and stability of plywood construction. Measuring **3/4" thick x 4-ft x 8-ft**, each panel features a **tambour face (A)**, a **1/2" plywood core (B)**, and a **cross-grain hardwood veneer backer (C)**, creating a balanced design that minimizes warping, cupping, and seasonal movement.

Balanced and stable, these panels **integrate easily into standard cabinetry, millwork, and furniture construction**, while offering a stylish, textured surface for doors, end panels, islands, and more. With a finished back for exposed applications and a cost-effective, premium look, **Full Size Rigid Panels deliver both design versatility and dependable performance for builders, designers, and cabinetmakers alike.**

### Key Features & Benefits of Full Size Rigid Panels:

- **Balanced & Stable:** The cross-grain hardwood veneer backer counters tambour movement, reducing the risk of warping, cupping, or cracking in varying environmental conditions. The 1/2" plywood core provides strength and dimensional stability without the cost of solid wood construction.
- **Design & Texture on the Face:** The beaded face adds depth and texture, making these panels a standout choice for a variety of design styles - from traditional to contemporary.
- **Standard Thickness:** At 3/4", the panels integrate seamlessly into standard cabinetry and millwork with no need for special adjustments.
- **Finished Back:** The hardwood veneer backer provides a clean, finished appearance for exposed applications like open shelving, islands, and freestanding furniture.
- **Sustainable Use of Materials:** Combines *solid wood aesthetics (tambour + veneer)* with *engineered core (plywood)*, which is more resource-efficient than using solid hardwood throughout.
- **Cost-Effective Design:** By combining tambour, veneer, and plywood, the panels offer the premium look of solid wood with greater efficiency and value.
- **PLEASE NOTE:** Full Size Rigid Panels stocked in Panel Style #127 only. Custom profiles and species available upon request.

**SKU:** 019648127-1

**Dimensions:** 48"W x 96"L x .75"T
