

# Designer DripEdge® Information

Designs of Distinction's Designer DripEdge® has been redesigned with radiused inside corners instead of square ones - an intentional improvement that enhances both form and function. The softened corners help prevent items like towels, clothing, or garbage bags from snagging on sharp edges, making it more user-friendly in everyday applications. Additionally, the radiused design offers a cleaner, more seamless fit on door styles that aren't perfectly square or that stray from traditional shaker profiles, providing greater versatility across a range of cabinet designs.

## Designer DripEdge® Features

- Please see our website for all 13 sizes.
- Made in the USA.
- Eased & finished ends.
- Pre-applied UHB tape for easy installation.
