"Design without Edges: Rounded Forms for Modern Living"

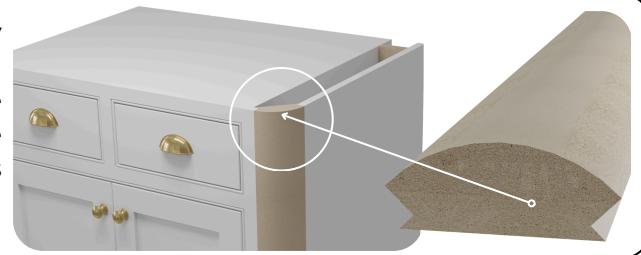

Designs of Distinction® Introduces "Design without Edges" — Spec-Ready Rounded Components developed to support curved cabinetry and millwork applications with precision and repeatability.

Chicago, IL — As residential design continues to evolve, rounded forms and softened profiles are increasingly being specified across kitchens, baths, and interior architecture. In response, Designs of Distinction® introduces **Design without Edges: Rounded Forms for Modern Living**—a collection-driven initiative focused on architectural components that support curved design with consistency and buildability.

While the demand for radiused millwork is growing, executing these forms on the job site often presents challenges in consistency and fabrication time. The shift toward **radiused forms reflects a need for spaces that feel custom and high-end, without sacrificing precision or efficiency during installation.**

To bridge the gap between design vision and build reality, **Designs of Distinction®** introduces **two complementary components** engineered for residential cabinetry and millwork at **KBIS Booth W173**:

1. Radiused Corner Mouldings Made in the USA from high-quality MDF, these mouldings soften cabinet and furniture edges with a consistent, repeatable radius. Engineered for precision, the profile ensures sharp machining and smooth paint acceptance. They are supplied unfinished, allowing for flexibility across finish schedules and project requirements.

2. Radiused Bases Also made in the USA, Radiused Bases provide a grounded foundation for curved cabinetry, islands, and furniture-style applications. Available in custom sizes and offered with or without toe kick space, the bases accommodate a wide range of residential and light commercial configurations, reducing the need for complex custom fabrication.

Together, these components allow builders, architects, and millwork partners to incorporate rounded forms into projects with confidence—reducing custom shop time while maintaining architectural intent and visual consistency.

Turn complex curves into spec-ready reality. **See the new components and materials that are part of the Design without Edges // Rounded Forms for Modern Living campaign at KBIS Booth W173**, and inspect the precise machining that makes these forms repeatable, paint-ready, and easy to install.

About Designs of Distinction® Designs of Distinction® blends craftsmanship, quality, and creativity to elevate kitchen, bath, and home interiors. Our catalog includes metal accent trim, decorative grilles, hardwood tambour, brass shelving, and more—offering stocked and custom components to suit every project. Proudly made in the USA whenever possible, we bridge the gap between design and construction with materials built for beauty, performance, and innovation.
