

Designs of Distinction[®] Introduces Anodized Aluminum Touch-Up Pens

(Chicago, IL): Designs of Distinction[®] is excited to announce the launch of **new anodized aluminum touch-up pens**—an innovative solution developed in response to years of customer requests for an **easy and effective way to conceal raw edges, minor scratches, and other surface imperfections on our aluminum components.**

After more than a year of testing and evaluation, we've selected **high-performance touch-up pens from Mohawk Finishing Products** that match our anodized aluminum finishes with exceptional accuracy. These pens are now available in six of our finishes: Warm Bronze (WB), Titanium (TM), Satin Brass (SB), Polished Brass (PB), Satin Stainless (ST) and Flat Black (WR).

Please note that Brushed Aluminum (BA) and Chrome (CR) finishes do not require touch-up pens, as the raw edges naturally blends with the finish. Additionally, Satin Brass (SB) and Polished Brass (PB) use the same touch-up pen.

"Many of our customers have asked for these pens to help maintain the refined look of our metal components after installation or customization," said Kathy Constantine, Vice President at Designs of Distinction[®]. **"We're proud to finally offer a reliable solution that upholds the quality and finish our customers expect."**

Using the pens is simple, but it's important to shake them **extremely well** and **prime them properly** before application for best results.

Designs of Distinction[®] continues to lead the industry with **solutions that support the craftsmanship and creativity of furniture makers, cabinet shops, and designers.** These new touch-up pens are just one more tool to help our customers deliver flawless final products.
